Presented By:

Mercedes Galloway, MD
University of Florida

Learning Objectives:

Upon completion of this activity, participants should be able to:

- Describe the indications, contraindications, and types of peritoneal dialysis (PD).
- Differentiate between continuous ambulatory peritoneal dialysis (CAPD) and automated peritoneal dialysis (APD) in terms of technique, benefits, and limitations.
- Demonstrate appropriate catheter care and aseptic technique for PD to minimize the risk of infection.
- Identify signs, symptoms, and management strategies for common complications of PD, including peritonitis and catheter malfunction.
- Evaluate patient-specific factors to determine suitability for initiating peritoneal dialysis as a renal replacement therapy.
- Develop a patient education plan that includes dietary recommendations, fluid management, and self-care practices for individuals on PD.
